

Rel Ruby (+7NF)

**moriq Ruby@関西
RejectKaigi2007**

SQL

- なんでこんな言語なんだ？
- **SELECT * FROM r**
- **SELECT * FROM r WHERE c**
- **SELECT name FROM r WHERE c**
- **SELECT ... FROM (SELECT name
FROM r WHERE c) JOIN s**

Tutorial D

- そこでTutorial Dですよ
- r
- r[c]
- r[c]{name}
- r[c]{name} JOIN s

D

- **data language specification**
- **http://en.wikipedia.org/wiki/Tutorial_D**

Rel

- Tutorial DのJava実装
- An Implementation of Date and Darwen's "Tutorial D"
- <http://dbappbuilder.sourceforge.net/Rel.html>

Rel Ruby

- RelをRubyで実装してみた
- [http://dev.moriq.com/svn/rails/
trunk/rel-ruby/](http://dev.moriq.com/svn/rails/trunk/rel-ruby/)

O/R mapper

- Object Model
- Relational Model
- なんでマッピングなんだ？

Relation Object

- **Relation.new(heading)**
- **r = Relation.new(id: Integer,
name: String)**

Tuple Object

- **Tuple.new(attributes)**
- **r << Tuple.new(id: 1, name: 'matz')**
- **r << {id: 1, name: 'matz'}**

Relational Ruby

- RubyでRelational Modelを表現
- r
- r.select { |t| t.name == 'matz' }
- r['name']
- r['name'].join(s)

Ruby(AR) vs DBMS

- validation
 - reference constraint
 - inheritance
 - locking
 - logging
 - index
- validation
 - reference constraint
 - inheritance
 - locking
 - logging
 - index

- **App + (RelEngine + Storage)**
- **(App + RelEngine) + Storage**

Thank you
